

Position: Quality Control/Assurance Technician

Date: 09/01/2010

Location: Wind Division

Posting #: Varies

Job Description:

- Implement and maintain quality assurance processes on project task level to ensure compliance with Wind Division and client quality standards
- Familiarity with turbine manufacturer's manuals and specifications for the assigned tasks on the turbine. Follow project-specific protocols, standard operating procedures (SOPs), and construction processes to comply with manufacturer's requirements and Wind Division standards
- Perform inspection procedures and document each assigned process performed by the field work crews or by Total Quality Technicians
- Provide recommendations to the Site Quality Assurance (QA) Manager for continuous improvement and update of the QA processes through lessons learned and project experiences
- Participate in project specific training related to quality procedures and methodology related to the assigned tasks/processes; act as trainer in the field for assigned tasks / processes
- Assist in providing technical support and troubleshooting for site-specific issues which arise during construction
- Help evaluate trends, failures and opportunities to improve results
- Ensure compliance with project safety requirements
- Attend regular site meetings with Site QA Manager to review QA processes for the project and/or general program updates
- Work closely with representatives from the turbine manufacturer, transporter, Owner, General Contractor, and Subcontractors to successfully implement each phase of the erection work
- Position requires extensive travel and often long hours
- Full-time position, salary, benefits package, incentive pay

Qualifications:

- Experience in wind turbine erection or related work. Knowledge of heavy lift equipment is a plus
- Understanding of quality assurance as a part of construction processes including the documentation of QA procedures
- Ability to perform detailed written documentation of quality assurance processes
- Experience with MS Office products helpful
- Valid driver's license
- Must pass drug test and background check
